

Technical Rider: "Festa colletta" mobile animation

Type of show: Mobile animation.

Three artists ride their cargo bike, walk, make music, do circus and seek interaction with the casual audience.

Duration: 2 x 45 min

Scene: We cycle around with a cargo bike Slightly sloping terrain is possible, no stairs.

Hard surface is good, no mud, loose sand...

The bicycle is 90 cm wide. She can't go through a standard door. She can go through a double door.

If there are many factors on our route that we have to take into account (such as where we can and cannot make noise, time schedules, where stops should be planned...) then it is valuable to have a guide who can point us in the right direction.

Sound: We play live music that we amplify with a battery. We can handle a certain amount of background noise, but it's better when there is little noise.

Please close to the place where the animation starts: Dressing room with mirror.

Outside inside? If there is heavy wind or rain, we can play in a covered place.
