

# Technical Rider street show by Cie Balltazar

## "Amici"

### **Type of show**

Street show, fixed (one location, one audience).

### **Duration**

Show: 35 minutes, set-up: 30 minutes, pack-up: 15 minutes.

### **Stage area**

Ground: Flat and horizontal (grass, concrete, wood, asphalt... no sand, no ploughed field, no gravel).

Surface: Minimum 7m x 5m with a free height of 4m.

### **Audience and setup**

The performance is suitable for all ages. The show works best in an "intimate" setting.

Avoid open spaces with moving elements behind the stage; a background such as a wall or hedge is preferred. Bleachers or benches are highly appreciated.

### **Ambient noise**

We perform live music. Other music or loud background noise is very distracting.

### **Electricity and amplification**

Power supply: 1 x 220V x 10A.

### **Lighting**

Only if performing after sunset. In this case, we require full stage lighting (front and backlighting).

### **Dressing room (close to the performance site)**

A dressing room equipped with a mirror and electricity.

### **Indoor/Outdoor**

In case of heavy wind or rain, the show can be performed indoors.

### **Food and drinks**

2 artists.

During the show: sufficient water.

After the show: A warm, healthy, balanced meal for 2 non-vegetarians. No allergies.
